

Please do not limit satellite radio, I pay for this service and I do not want the government or the NAB regulating some that I pay for and choose to use. Big government needs to stay out of private business. I live in Atlanta and want the traffic and weather station, no other radio offers 24 hour service in this area, I guess the NAB is just upset they did not think of it first. Leave Satellite radio alone. Freedom of Speech in America, please.
